GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

STATEMENT OF WATER DIVERSION AND USE

\$100

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water Richard Cuneo Fox & James Lowell Munn  
Address 127 Humboldt St. San Rafael & PO Box 3, Corte Madera, Marin Co., Calif

B. Name of body of water at point of diversion Cuneo Creek  
Tributary to Maxell Creek then Merced River

C. Place of diversion 1/4 Section 22, Township 25, Range 16E, Mariposa Co., or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks. B&M

D. Name of works Pump

E. Capacity of diversion works 100 gal/min  
Capacity of storage reservoir \_\_\_\_\_  
State quantity of water used each month in gallons or acre-feet  
Year Jan. Feb. Mar. Apr. May June July Aug. Sept. Oct. Nov. Dec. Total Annual  
: : : : : : : : : : : : : : : : Tap  
If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.  
Maximum annual water use in recent years 10000 feet  
Minimum annual water use in recent years 1 acre foot  
Type of diversion facility: gravity \_\_\_\_\_, pump ☒  
Method of measurement: weir \_\_\_\_\_, flume \_\_\_\_\_, electric power meter \_\_\_\_\_, water meter \_\_\_\_\_, estimate ☒  
F. Purpose of use (what water is being used for) Irrigate garden & supply reservoir  
G. General description or location of place of use (use sketch of section grid on reverse side if you desire) See Map  
H. Year of first use as nearly as known 1880  
I. Name of person filing statement Richard Cuneo Fox  
Position Half-Owner Organization \_\_\_\_\_  
Address 127 Humboldt St. San Rafael, Calif

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.
